

THE GIFT OF HEALTH

We need your help to get medical aid to 100,000 people over Christmas. This will include antibiotics for children, life-saving medicine for pregnant women and emergency medical kits to treat families whose lives have been turned upside down.

A £10 gift to IHP enables 20 treatments to reach those in need.

- displaced families and children in Iraq
- cholera victims in Yemen
- children with cancer in Tanzania
- victims of disaster and,
- many others who would otherwise have little or no access to medicine

For every £1 we receive we can send medicine worth over £15

IHP is the largest coordinator of donated medical products in Europe with a strong network of healthcare industry donors. We respond rapidly to humanitarian disasters, support long-term healthcare development projects and equip doctors with supplies for short-term missions.
